What is Google Business Profile White Label Service

Do you want to increase your agency's recurring revenue?

Our Google Business Profile (GBP) White Label services was designed for your agency.

You don't have time to be the expert in everything, especially with ever-changing technologies. Platforms online move at the speed of light. Whether you currently provide website design, social media management, PPC campaigns, or other online marketing, you already have the customers.

Adding this new service will boost your client's bottom line and make you their superstar!

The best part is you don't need to keep up with Google guideline clarifications and new features. Let us handle all that extra work for you!

Offer this new service to your clients, GBP Management, and let us do the work for you behind the scenes. You continue to work directly with your client that you have built a relationship with and we won't contact them.

We are there for you doing the work and answering any questions you have. This means more money for your agency without additional work, learning or keeping up with GBP!

Grow Your Agency's Recurring Revenue

Why You Need Google Business Profile Management Services

Your clients are local businesses that need to get more customers through leads and conversions. Most businesses don't understand the importance of their GBP Profile and miss the opportunity. Help your clients increase their bottom line by including GBP Management in their local marketing strategy.

Your customers look to you for guidance to stay on top of new and changing technologies. GBP is often referred to as a business's new homepage because some customers call or make an appointment right there from your GBP profile without ever making it to your website.

GBP pages must be optimized and effectively managed.

You can't just set it and forget it. GBP doesn't work like that!

A consistently optimized and monitored GBP account will **work for your client's business** getting them leads and conversions.

GBP and Local SEO is what we do. **You now have the experts on your team**, so you can impress your clients without adding more work to your busy schedule.

GBP Experts on Your Team

Google Business Profile Management Services for Agencies Includes:

- White Label Support
- Monthly White Label Reports
- Unbranded GBP Account Access
- GBP Audit and Monthly Account Management

How GBP White Label Services Work - FAQ

What do we need from you, the agency?

You can [sign your agency up online](#). We will prepare branded landing pages for you and send you an agreement to sign. When you have a client ready to sign-up, you or your client can complete the information on your new branded welcome page – it's up to you.

Where does the monthly content come from?

We'll be posting weekly to your client's GBP account. There is an online form to provide the information needed every month. You or your client can upload the necessary content, including photos, specials, etc.

How are your clients contacted?

We won't contact your clients directly. For monthly content, either you or your client will complete our online form. It is entirely White Labeled; the choice is yours.

If there are questions, we will contact you for additional information. For example, we will send any 3 star or below reviews to you with a proposed response to get additional information from the business about the review before we post the reply.

➤ **Is there a set price we are required to charge?**

No, you set your fees with your client. You decide what your profit margin is, not us!

➤ **How do we begin?**

Ready to boost your agency's recurring revenue?

[Contact Us](#) for More Information on White Labeling

➤ **Are referral fees an option if I don't want to offer GBP Management services?**

Yes! If you aren't looking to add another service and prefer your client simply [contact us](#) directly, we offer referral fees.

➤ **Instead of Monthly Management, do you offer a one time optimization?**

Yes, Google is not a set-it-and-forget-it profile so we recommend clients go with a monthly service. However, we do have a Setup/Audit & Optimization which is basically the same cost as 2 months of service, but they are not getting additional management with this. The White Label price is \$760 for this service.

 My client's GBP is a hot mess and they can't sign up for your service. Can you help?

Yes! We offer [GBP Fix It™ Services](#). We offer this service white label as well. The prices are based on the specific issue they are having. The prices normally range from \$850 - \$1,500. [Contact us](#) now for questions about our GBP Fix It™ Services.

Boost your client's online presence and leads while increasing your recurring revenue with GBP!
